

Anolis UK can offer a CIBSE approved seminar on façade lighting for your staff.

The CPD is largely based on the latest 2016 LG6 guide for external lighting, focusing more specifically on lighting of building facades and media installations. The learning objectives include:

- A definition of LED and where it sits in the lighting industry.
- Understanding design possibilities with architectural façade lighting.
- Understanding the application and options for dynamic lighting in architectural design.
- Considerations for specifying a good quality LED system.

If you are interested in hosting a seminar for your staff or would like to attend a seminar then please email alex.kreloff@robeuk.com or call 01604 741010 for more details.
